Pegasus Opera 3 & Opera II Software Requirements

Please check the Microsoft website for hardware requirements for the relevant environment.

This guide lists the supported software products and environments for the latest available versions of Opera 3 and Opera II, including the supported editions of Microsoft Office, Microsoft SQL Server, Microsoft Windows Server and desktop editions, and browsers.

Microsoft Mainstream and Extended Support

Opera is tested using, and supported for Windows products mentioned in this guide that are under Microsoft **Mainstream Support**. We also offer support when Microsoft products are under Microsoft **Extended Support** but we don't test using those environments.

Support from Pegasus Software will end when Microsoft extended support ends.

Some Microsoft products are not supported at all for Opera II.

System Performance

Please keep the following in mind when deciding on hardware. System performance of each PC and server depends on:

- the computing power
- how they are configured, and what Windows features are installed
- the number of applications running, including anti-virus utilities, backup utilities, screen savers, and power savers
- the number of users in Opera and the amount of Opera data throughput and the number of locations where Opera is used
- whether the Opera Client installation is used on the file server, adding an additional load on the server.
