

Opera 3 SQL SE - Installation and Implementation steps

 Checking prerequisites	 Installing server software	 Configuring server software	 Installing clients	 Housekeeping	 Migrating data
<p>In this stage, you need to check that the necessary prerequisites are installed</p> <p>Verify these are installed on Windows Server 2016 +</p> <div style="border: 1px solid red; padding: 5px;"> <p>1. Microsoft .NET Framework 4.7 +</p> <p>2. Microsoft SQL Server 2014 + (with 'TCP/IP' enabled and appropriate roles enabled)</p> <p>3. Microsoft Report Viewer 2015 Runtime</p> </div> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 1: Checking the prerequisites</p> </div>	<p>In this stage, you must download the software and install the Opera 3 SQL SE server software</p> <p>Download the software</p> <div style="border: 1px solid red; padding: 5px; margin: 10px 0;"> <p>Update the 'Setup.peg' file with the name of the server</p> </div> <p>Run the Opera 3 SQL SE server software setup program</p> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 2: Installing server software</p> </div>	<p>In this stage, you must configure the Opera 3 SQL SE server software using Server Administration & Monitoring</p> <p>Add the SQL Server name on the Initial Configuration view</p> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 3: Configuring Opera 3 SQL SE</p> </div>	<p>In this stage, you must install the Opera 3 SQL client installations on the server and each client PC</p> <p>Run the client software setup program on the server and on each Windows 10 client PC</p> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 4: Installing client software</p> </div>	<p>In this stage, you should consider running 'housekeeping' routines to remove unwanted records before migrating data</p> <p>Run Opera 3 (Visual Foxpro database) or Opera 3 SQL (SQL Server database) and complete the housekeeping routines</p> <div style="border: 1px solid red; padding: 5px; margin: 10px 0;"> <p>Use the latest version to do this. This can be done at any time before doing the data migration</p> </div> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 5: Doing Housekeeping</p> </div>	<p>In this stage, you must use the migration tool to migrate existing Opera 3 data to Opera 3 SQL SE</p> <p>Use the migration tool in Server Administration & Monitoring to migrate data from Opera 3 (Visual Foxpro database) or Opera 3 SQL (SQL Server database)</p> <div style="border: 1px solid gray; padding: 10px; text-align: center; margin-top: 20px;"> <p>See Stage 6: Migrating data</p> </div>
