

Before using Pegasus Mobile Sales on your Android tablet

1

Download Pegasus Mobile Sales from Google Play Store

2

Install a VPN and log on to your business network (not necessary if Pegasus Web Xchange is publically accessible on the Internet)

3

Open Pegasus Mobile Sales from the apps folder

4

Server

Please enter the full server name of the Pegasus Web Xchange (PWX) server to which the Pegasus Mobile Sales App will be linked.
If you are unsure of the PWX server name then please refer to the Help topic for setting up the server, accessed via the overflow menu.

Domain URL

CANCEL CONFIRM

Enter your business domain URL name on the server screen.

1. If Pegasus Web Xchange is publically available on the internet, enter the address name followed by the name of the website entered when Pegasus Web Xchange was installed. The easiest way is to copy and paste the address from your web browser's address field.

2. If Pegasus Web Xchange is not publically available but is available on an intranet after logging on to your corporate network, enter the name of the website server where Pegasus Web Xchange is installed - including the domain name - followed by the name of the website.

Then confirm.
